COURSE STRUCTURE

▪ **Professionalizing Internship**

he student can be initiated to the clinical internship to be carried out at the structure in charge, after the head office has agreed with the Coordinator of the Master's Degree Course in Nursing and Midwifery Sciences, the destination, chosen on the basis of the student's educational needs.

The internship hours foreseen for each academic year are divided as follows:

- 1st year: 375 hours
- 2nd year: 375 hours

The student will have to carry out 6 hours a day of internship, from Monday to Saturday, from

07.30 to 13.30. Alternatively, it will be possible to agree with the Headquarters Representative the possible development of the internship hours from 14.00 to 20.00.

The period of time to complete the internship is foreseen by 30 / July of the A.Y.

The terms will not be granted exemptions, except for serious needs of the student

which in any case must receive appropriate evaluation from the Course Coordinator of Graduation.

The 2nd year student is given the opportunity to carry out an internship of 50-hour internship to be carried out at the service relevant to the topics that make up the final degree thesis. However, admission is subject to availability of the service where the internship should take place and the real needs training courses, which in any case will be evaluated by the Degree Course Coordinator Master's degree in "Nursing and Obstetric Sciences".

At the beginning of each A.A. the student must collect from the competent Secretariat, the appropriate form to be used for recording the activities carried out and the hours of Internship. At the end of the clinical training period, it will be the student's care return the form to the Secretariat.
