DEPARTMENT OF GENERAL SURGERY AND MEDICAL-
SURGICAL SPECIALTIES
Master's Degree in Medicine and Surgery
Academic Year 2020/2021 - 5° Year

ANATOMIA PATOLOGICA - channel 3

MED/08 - 5 CFU - 1° Semester

Teaching Staff

LUCIA SALVATORELLI

Email: lucia.salvatorelli@unict.it

Office: U.O.C Anatomia Patologica, Dipartimento G.F. Ingrassia, via S.Sofia 87

Phone: 095 378 2138

Office Hours: 11,00-12,00

LEARNING OBJECTIVES

Knowledge of the morphological and molecular features, nosological classification and differential diagnosis of the main diseases. Knowledge of early diagnosis, prognostic and predictive factors of neoplastic diseases.

COURSE STRUCTURE

Frontal teaching.

Should teaching be carried out in mixed mode or remotely, it may be necessary to introduce changes with respect to previous statements, in line with the programme planned and outlined in the syllabus.

DETAILED COURSE CONTENT

Pathology of the digestive system. Esophagus: notes on major congenital anomalies and diseases of motor abnormalities; Infectious esophagitis, gastroesophageal reflux disease and Barrett's esophagus; morphological pictures and anatomo-clinical correlations of esophageal cancer. Stomach: main morphological pictures of gastritis and gastric ulcer; the role of endoscopic biopsy; anatomic and clinical pictures of gastric cancer. Non-epithelial tumors and gastric GIST. Small intestine and colon: enterocolitis; malabsorption syndromes; idiopathic inflammatory bowel disease; vascular diseases; benign and malignant tumors: general, morphological pictures, progression adenoma-carcinoma, familial polyposis, staging. Diseases of the liver and biliary tract. Circulatory disturbances of the liver. Acute and chronic viral hepatitis; cirrhosis of the liver: morphological pictures, evolution and complications; liver biopsy. Notes on alcoholic liver disease and the main metabolic liver diseases. General and main morphological pictures of biliary cirrhosis and primary sclerosing cholangitis. And hepatocellular tumors colangiocellulari: morphological pictures, complications and natural history. Cholelithiasis. Carcinoma of the gallbladder and extrahepatic bile ducts: morphological pictures, natural history and complications.

Diseases of the pancreas. Pancreatitis: morphological pictures, natural history and complications. Pancreatic cancer: morphological pictures, natural history and complications.

Diseases of the kidney, the lower urinary tract and the male genital. Main cystic kidney diseases: classification and morphological pictures. Circulatory disturbances of the kidney: classification, pathogenesis and morphological pictures. Primary and secondary glomerular diseases: overview, classification, pathogenesis, natural history and complications, morphological pictures; the role of renal biopsy. Tubulopathies: general information and main morphological pictures. Urolithiasis. Interstitial nephritis: etiology, natural history and complications, morphological pictures. Toxic nephropathy and drugs. Kidney tumors: epidemiology, natural history, morphological pictures, staging. Bladder cancer: epidemiology, natural history, morphological pictures, staging. Prostatic hyperplasia. Prostate cancer: pathogenesis, natural history, morphological pictures. The role of the prostate biopsy. Didymus and epididymal tumors.

Disease of the breast. The breast lump: diagnostic procedure. Cytodiagnosics by aspiration. Secretions from nipple. Intraoperative biopsy and histology. Fibrocystic breast disease: histologic lesions elementary and pre-neoplastic. Benign breast tumors: papilloma, fibroadenoma. Phyllodes tumors. Breast cancer: epidemiology, risk factors, early diagnosis, natural history, morphological pictures and prognostic factors. Histological type, histological grade and stage. Hormone receptors. The sentinel node: rational and applications. Gynecomastia and male breast cancer.

Pathology of the female genitalia. - Cervicitis. CIN and invasive cervical cancer: risk factors and diagnostic role the cytology smear (Papanicolaou test). - Causes of abnormal uterine bleeding. Dysfunctional. Adenomyosis and endometriosis. Endometrial hyperplasia (simple, complex, with atypia). Endometrial polyps. Endometrial cancer. Benign and malignant mesenchymal tumors of the uterus. Diseases Trophoblast: vesicular mole, choriocarcinoma. - Ovarian cysts non-neoplastic. - Ovarian tumors: classification histogenetic. Prognostic factors of ovarian cancer.

Diseases of the central nervous system. Hydrocephalus. Causes of intracranial hypertension and complications, brain herniations. Morphological pictures and correlations with the etiology and natural history of disorders of cerebral circulation: dural hematoma, subdural hematoma, aneurysms, subarachnoid hemorrhage, cerebral hemorrhage, heart attack. Inflammatory diseases: meningitis, brain abscess, viral encephalitis. Spongiform encephalopathies. Main morphological pictures of degenerative diseases: Alzheimer's disease, Parkinsonism, Huntington's disease. Demyelinating diseases: multiple sclerosis. General overview and morphological pictures of CNS tumors, with reference to the epidemiology and natural history. Role of stereotactic biopsy. Metastatic tumors of the CNS.

Skin cancers. Malignant epithelial tumors of the skin: morphological pictures and natural history of squamous cell carcinoma. Nevi and melanomas: epidemiology and natural history. Pattern of growth and prognostic factors of melanoma.

Diseases of the musculoskeletal system. Main morphological pictures of the most common bone changes of endocrine or metabolic nature, primary and secondary (rickets, Paget's disease, osteomalacia and osteoporosis). Essential diagnostic aspects of osteomyelitis, and osteoarticular tuberculosis. Classification of primary and metastatic tumors of the skeleton and soft tissues. Staging.

Pediatric tumors Round blue small cell tumors: neuroblastoma, rhabdomyosarcomas, Ewing / pPNET sarcoma, Wilms' tumor, lymphoblastic lymphomas, Burkitt lymphoma, desmoplastic small round cell tumor of the abdominal cavity.

TEXTBOOK INFORMATION

Robbins - Cotran "Le basi patologiche delle malattia" 9a edizione Elsevier

Gallo - D'Amati Anatomia Patologica - La sistematica" UTET

Mariuzzi - Anatomia Patologica e correlazioni anatomo-cliniche - Piccin
