PARTIAL DIFFERENTIAL EQUATIONS IN APPLIED SCIENCES
MAT/05 - 6 CFU - 1° semestre

Docente titolare dell’insegnamento
MARIA ALESSANDRA RAGUSA
   Email: maragusa@dmi.unict.it
   Edificio / Indirizzo: Dipartimento di Matematica e Informatica
   Telefono: 0957383060
   Orario ricevimento: martedì 14-16 e giovedì 11-13

OBIETTIVI FORMATIVI
Knowing how to construct and understand mathematical models that describe qualitatively and quantitatively some phenomena related to the environment. Knowing how to use the main concepts of differential equation theory for application in the biological, geological and environmental fields. Knowing how to predict and justify the evolution of simple phenomena, described by ordinary differential equations, related to the biological, geological and environmental sciences.

MODALITÀ DI SVOLGIMENTO DELL’INSEGNAMENTO
Frontal class.

Should teaching be carried out in mixed mode or remotely, it may be necessary to introduce changes with respect to previous statements, in line with the programme planned and outlined in the syllabus.

Learning assessment may also be carried out on line, should the conditions require it.

PREREQUISITI RICHIESTI
Calculus, first course. Basic elements of geometry. Study do the graph of a variable

FREQUENZA LEZIONI
Obligatory.
CONTENUTI DEL CORSO

3. Models for environmental systems. Model for the evaluation of the green quality. Model for the evolution of metastability in an environmental system. Model for the evaluation of the production and diffusion of biological energy in an environmental system.

TESTI DI RIFERIMENTO

1. S. Motta, M.A. Ragusa, A. Scapellato – Methods and mathematical models - ed. CULC (2020)

VERIFICA DELL'APPRENDIMENTO

MODALITÀ DI VERIFICA DELL'APPRENDIMENTO
Frontal exam. Criteria for assigning the final grade: verification of the achievement of the educational objectives expressed through the European Descriptors of the qualification.

Verification of learning can also be carried out electronically, should the conditions require it.

ESEMPI DI DOMANDE E/O ESERCIZI FREQUENTI
