LEARNING OBJECTIVES

▪ LA REGOLAZIONE DELL'ECONOMIA TRA STATO E MERCATO

The main objective of the module is to provide the theoretical and methodological basis of sociological analysis of economic phenomena, also following the evolution of the most relevant issues and research perspectives of the discipline from the classics to the latest developments.

▪ POLITICHE SOCIALI E SISTEMI DI WELFARE

The module aims to provide the conceptual and analytical basis for the study of social policies. In addition, a specific part will be dedicated to the analysis of labour market policies, taking into account the changes characterizing the labour market in recent decades. In both cases it will be used a perspective of comparative analysis.
