### LEARNING OBJECTIVES

The course aims to provide the students with the fundamental coordinates in the vast panorama of tourism legislation.

Starting from an introduction to the basic aspects of the Italian legal system (necessary for those students who have never dealt with the study of legal matters), we will examine the discipline of the main fields of activity of the sector: tourism companies and tourism professions. Particular attention will be paid to contracts generally stipulated in the field of tourism and to the responsibility of the operators of the sector.

Through a very practical approach to the topics (with numerous examples and the use of forms, standard contract, etc., in use), it will aim to develop the concrete application of legal rules to enable students, Touristic Operators in training, to carry out their work properly in the future.

For that reason, frequency is strongly recommended.

---

### DETAILED COURSE CONTENT
