LEARNING OBJECTIVES

- **Orthopaedics and Traumatology**

The aim of the professional training is to show the daily management of a Department of Orthopedics and Traumatology.

- **Hygiene**

At the end of the internship the student must be able to collect scientific data, process and expose them, discussing in the classroom.

DETAILED COURSE CONTENT

- **Orthopaedics and Traumatology**

The student, supervised from a tutor, will have access to:

- The ward of orthopedic and traumatological patients;
- The casting room, where the main types of immobilization and the management of small traumas will be shown;
- The out-patients, where the main orthopedic and traumatological diseases are treated and the patients already undergone surgical treatment are followed-up.

- **Hygiene**

Collection of scientific data;

Data processing;

Power point presentation of the collected data.
